Figure 1: Zimbabwe – key economic indicators

GDP % growth, 2005–15

Source: IMF.

**Ferrochrome price – gold price – platinum price**
1 Nov 2005–1 Mar 2016

Source: InfoMine.
Prices for Zimbabwe’s primary commodity exports have fallen, reducing export revenues.

**South African rand to US dollar exchange**

Source: XE currency charts.
The dollar has strengthened against the rand, making Zimbabwe’s exports less competitive.

**Non-performing loans (NPLs) 30 Jun 2009–30 Jun 2016**

The level of NPLs has been markedly reduced, largely through ZAMCO.

**Commercial banks balance sheet (Jan 2015–Mar 2016 % total deposits)**

But the banking sector is at risk, as government debt in non-convertible dollars has flooded the banking system.
